

Johannesburg, 24-25 March. Booth #A3

## **PROINSO to present new integrated solutions at the Solar Show Africa in Johannesburg**

### **Proinso to launch GPM monitoring and management solutions for South Africa**

- **PROINSO to present its new integrated solutions at the Solar Show Africa 2015 (Johannesburg), to be staged 24 and 25 of March (Booth #A3). Also the launch of both Mecasolar structures, which are manufactured by a PROINSO affiliate Company and new concept hybrid solutions.**
- **The company is strengthening its position in the South African solar PV market, where PROINSO opened a new branch in 2013.**
- **Proinso to launch new monitoring and telemetry services in South Africa. Green Power Monitor (GPM) is used for optimizing the performance of photovoltaic plants.**

23 March 2015. PROINSO will participate in the Solar Show Africa (Booth #A3), to be held in Johannesburg on 24 and 25 March. It is the leading show in the solar power sector in South Africa, with 200 exhibitors from as many as 26 countries and drawing more than 6,000 professional attendees.

Proinso to launch GPM in South Africa, with over 3GW of asset management there is an increasing demand for bankable monitoring and management solutions. In addition to that PROINSO is to present the latest products from SMA, INGETEAM, JINKO, MECASOLAR and its own EPM service (Engineering, Procurement and Management Service).

PROINSO **strengthens its presence and penetration in the South African market**, where it has recently launched a pioneering online store with **Click & Collect service** ([www.proinso.co.za](http://www.proinso.co.za)). The products will be ready to pick up in one to five days at the nine collection locations countrywide. For the installer this means logistics support and just in time warehousing for projects in their locality or further afield allowing them to focus on their core business.
