

PROINSO Mexico set to present new solar solutions at The Green Expo

For immediate release

One of the largest integrator and distributor companies of solar components in the world, [PROINSO](http://www.proinso.net), will be exhibiting at The Green Expo in Mexico this week (Stand 334). Held in Mexico City from 23 - 25 September, it is the leading show in the solar power industry in Mexico with over 200 exhibitors and 10,000 professional visitors set to attend.

As an official dealer to the Mexican solar market, PROINSO will present the latest products from SMA. The micro inverter Sunny Boy 240-US is designed to meet the needs of the Mexican photovoltaic market, in turn strengthening PROINSO's local leading position.

PROINSO has enjoyed some significant presence in the Mexican solar market over the past year. The company was named Installer of the Year at MIREC AWARDS 2015 and opened a new office branch in Monterrey in March 2015.
